

## The Dr. Jeffrey Tucker Health Center

This comprehensive body composition system provides real-time, accurate monitoring and trending of your patients' crucial biometrics.

Using the FDA-cleared Dr. Jeffrey Tucker Body Composition Analyzer and an Internet connected computer, it only takes a couple of minutes to measure body fat, lean mass, hydration levels and Basal Metabolic Rate with clinical grade accuracy.

Each person's biometric data is instantly stored on a [secure, password-protected](#) health record that can be accessed at any time from any internet enabled PC.

Patients and their health coaches can easily log in to the user-friendly web interface to review results and evaluate progress. Coupled with a professional Health Care program, this monitoring system creates strong, precision-guided results for each user and provider.

The Dr. Jeffrey Tucker Health Center is a vital and highly visual offering in virtually any health program. It's a "win-win" solution, delivering powerful benefits to individuals committed to improving their health as well as the health professionals committed to helping them do so.
